

Division Capabilities

Marine Consultants & Surveyors

ABOUT THE DIVISION

Formerly operating as Rodds Bay Maritime, MIPEC Marine Consultants & Surveyors (MCS) have been providing multidiscipline services to the marine industry for 25 years, blending core capabilities with a proven history of delivering these services. MCS focus is to offer these services and expand capabilities to offer our clients cost effective, innovative and practical solutions.

MCS is led by a team of experienced surveyors with expert knowledge of local procedures, who work in accordance with national and international standards. All our marine surveyors are members of the Australasian Institute of Marine Surveyors, conducting all surveys under the codes of practice, ethics and conduct as set out by the Institute.

As a successful, leading marine consulting and surveying company employing 11 full time staff, MIPEC MCS can safely deliver services through a roster based fatigue management system and remains one of the few operators within this sector holding accreditation to:

- ISO 9001
- ISO 18001
- ISO 14001
- AS/NZS 4801

MIPEC has been recently rated by the independent Oil and Gas accreditation agency “Achilles” as being one of the top performing systems within the industry.

MARINE SURVEYING

Cargo

- Terminal Representatives: reducing the risk exposure for terminals through development of strategic programs targeting efficient ship loading/discharge, reduced delays, improved ship/shore interface stakeholder understanding and engagement
- Draught Surveys: accurate establishment and reporting of loaded quantities and distribution of dry bulk cargoes
- Trimming Surveys and Loading Master Services: representing terminals or independently appointed to assist vessel personnel to ensure planned stowage, vessel trim, safety and seaworthiness within statutory and regulatory requirements
- Cargo: loading & discharge including general, break-bulk/project, container packed

Inspection

- Accredited grain surveyors: Fitness to Load Certification
